

## GAS Living Wage Policy

We're very proud that **GAS Studio** is a Living Wage Employer, accredited by the [Living Wage Foundation](#). This means that everybody employed by GAS Studio earns a minimum of £9.50 per hour (correct as of 2021).

As a brand design company, our employees generally earn significantly more than this, but we still believe it's important to make this commitment.

In general, we don't have a fixed salary structure. We tailor each salary to the individual concerned, taking into account their experience, qualifications, skills and abilities.

We believe this is important for all that we employ even on a casual basis and we do our best to ensure our suppliers are also fair employers.
